

## MEASUREMENT GUIDE (Gazebo Top View)

1. Roof Length Measure outside edge to outside edge
2. Roof Width Measure outside edge to outside edge
3. Length Measure outside corner to outside corner. **Dot to Dot**
4. Width Measure outside corner to outside corner. **Dot to Dot**
5. Side Panels Measure from top edge of panel to bottom edge of panel

### **Special Requirements:**

- a. Use exact measurements – please do not round up or down
- b. If there are rafters, measure the distance between the center of the rafter to center of next rafter. And measure center of rafter to outside corner
